

# Mastercraft fittings

Barber Wilsons designed and manufactured this classic range of Mastercraft fitting in the early 1930's when Art Décoratif (Art Deco) was so in vogue. The original hexagonal designs with their distinctive facets are an ideal way of achieving a bathroom styled in this manner. Their solid construction from modern materials ensures they are easy to install, maintain and use. Available in chrome, nickel and inca finishes. Note: Mastercraft fittings are not available with ceramic disk headworks.
